PROFESSIONAL SUMMARY

Senior PHP Backend Developer with 7 years of experience designing, building, and optimizing server-side applications and RESTful APIs using PHP 7.x/8.x and Laravel. Strong hands-on background in MySQL database design and query optimization, Redis caching, JWT-based authentication, and Git-driven version control workflows on Linux server environments. Skilled at debugging and troubleshooting issues across the full application stack — from database queries to API endpoints — and collaborating with frontend and cross-functional teams to ship secure, scalable, high-traffic backend systems. Available immediately and comfortable working independently in a remote, contract-based engagement.

CORE TECHNICAL SKILLS

Languages & Frameworks: PHP 7.x / 8.x, Laravel, JavaScript, HTML5, CSS3

Databases: MySQL, SQL query design & optimization, Eloquent ORM, relational schema design

APIs & Integration: RESTful API design & development, JWT Authentication, third-party API integration, Postman

Caching & Performance: Redis, application performance tuning, query optimization, scalability improvements

Version Control & Environment: Git, GitLab, Linux server environments, AWS, deployment workflows

Practices: Agile methodology, code reviews, MVC architecture, PSR coding standards, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Programmer Analyst (PHP Laravel)

Jun 2023 – Present

HAL Simplify Solutions, Chennai — ERP Product Company

- Develop and maintain a multi-module ERP backend platform using PHP, Laravel, and MySQL, deployed in production for 50–100 SME clients across manufacturing, retail, and services.
- Design, build, and secure 20+ RESTful API endpoints with JWT token-based authentication, enabling real-time data exchange between the backend, mobile applications, and third-party integrations.
- Engineer normalized MySQL schemas and refactor slow-running SQL queries, improving backend response times and preserving data integrity under concurrent multi-user load.
- Debug and troubleshoot issues across the full application stack — database queries, API endpoints, and server-side logic — resolving production incidents efficiently.
- Implement Role-Based Access Control (RBAC) with granular permission levels across all modules, reducing unauthorized access incidents.
- Conduct regular code reviews, enforcing Laravel best practices, PSR coding standards, and clean, maintainable MVC architecture.

Associate Web Developer (PHP)

Jul 2021 – Mar 2023

Recochain Pvt Ltd, Chennai

- Maintained and enhanced a PHP/MySQL-based ISO Certification Management System for an international (Australian) client, automating audit scheduling, document control, certificate issuance, and compliance tracking.
- Built a secure client onboarding and management portal, improving backend data validation, renewal-alert workflows, and reporting, resulting in measurable gains in operational efficiency.
- Collaborated closely with frontend developers to integrate user-facing features with server-side logic and APIs.

Web Developer (PHP)

Jun 2019 – Jun 2021

Web Tech Park, Madurai

- Designed and built a Chit Fund ERP backend in PHP, jQuery, and MySQL, automating member management, auctions, collections, accounting, and reporting.
- Developed an HRM backend module covering employee profiles, attendance, payroll processing, and leave management, eliminating manual HR errors.
- Built a custom PDF report generator converting dynamic business and financial data into formatted downloadable reports for stakeholder communications and audits.
- Delivered end-to-end billing systems — invoice generation, receipts, inventory management, and payment tracking — with optimized SQL-driven reporting and reconciliation.
- Wrote clean, maintainable, well-documented PHP code following industry best practices across multiple concurrent client projects.

EDUCATION

M.Sc Computer Science — Thiagarajar College, Madurai (Jun 2017 – May 2019)

B.Sc Computer Science — S. Vellaichamy Nadar College, Madurai (Jun 2014 – May 2017)
